

## Protect Your Family Get your Bed Bug Warranty Today!

Provide your family with peace of mind this holiday season with a new bed bug warranty. If your traveling or plan on hosting out of town guests, contact us today about safe guarding your home.

Bed Bugs are more common then most people realize. And as more people travel throughout the US and abroad, bed bugs are coming home with them.

### **Why Are Bed Bugs Reappearing?**

Bed bugs were once all but eradicated with broad-spectrum pesticides such as DDT, which killed a wide variety of bug types. Concerns about health and the environment led to many of these pesticides being removed from the market.

### **Where Did Bed Bugs Come From?**

Bed bugs travel well, and are hitch hiking there way to your house in luggage and even clothing. The bugs are increasingly found hiding in beds, upholstered furniture and behind baseboards in urban hotels in America. Since they tend to stow away and travel with humans, any place that sees a number of world travelers is susceptible.

### **What does the Killingsworth Bed Bug Warranty Cover?**

This warranty includes an inspection with one of our K-9 sent detection teams to clear the residence for this new warranty. The warranty includes a free heat treatment (\$1,500 value) if any live activity occurs during that year. Warranty does not cover homes with current bed bug activity.
